PROFILE

Java Backend Developer with 2+ years of experience designing and developing secure, scalable backend applications. Experienced in the banking domain, building REST APIs, payment integrations, and backend services using Java, Spring Boot, JDBC, Oracle, and PostgreSQL. Passionate about building reliable software and continuously learning modern backend technologies.

SKILLS

Technical: Java, Spring Boot, JDBC, Hibernate/JPA, Java Servlets, RESTful APIs, SOAP Web Services, Microservices, JWT Authentication, AES Encryption, SQL, JSON, XML, PostgreSQL, Oracle, HTML, CSS, JavaScript, JasperReports

Tools: Git, Maven, Postman, IntelliJ IDEA, Eclipse, VS Code, iReport

EXPERIENCE

Yalamanchili Solution for Payment

Chennai, India

Junior Java Developer

JUN 2024 – Present

- Designed and developed **RESTful APIs** using Java and Spring Boot for **payment processing and banking applications**.
- Implemented **JWT-based authentication and authorization** between two applications to enable secure Multi-Factor Authentication (MFA).
- Designed **secure API communication using AES encryption** for request and response payloads.
- Optimized **SQL queries** to improve backend performance and reduce **response time**.
- Collaborated using **Git** for **version control, code reviews, and branch management**.
- Resolved **production issues**, improving **application stability and reliability**.

PROJECTS

Superb Prepaid Cards (Java, Spring Boot, REST APIs, Oracle DB)

SEP 2024 – Present

- Designed and implemented scheduler-based REST APIs for NEFT and fund transfer processing, integrating with City Union Bank (CUB) systems to automate payment transactions and support daily banking operations.
- Developed REST APIs for payment inquiry and transaction status retrieval, enabling faster transaction monitoring and reducing manual verification efforts.
- Developed SOAP APIs for card reactivation and CVV generation, enabling secure card operations for web and mobile applications used by card users.
- Implemented AES encryption and API key-based authentication to secure sensitive payment data and ensure safe communication with external banking systems.
- Maintained backend APIs and services, ensuring high availability, reliability, and smooth payment processing.

CUB Corporate (Java, SOAP APIs, Oracle DB)

JAN 2026 – MAR 2026

- Designed and developed SOAP APIs for employee account statement inquiry and download within the corporate banking portal.
- Built account statement retrieval functionality to provide secure and efficient access to corporate financial data.
- Developed transaction limit management features, enabling administrators to configure and enforce employee transaction limits securely.

EDUCATION

Marwari College (Ranchi University)

Ranchi, India

Bachelor of Science in Information Technology

2019 – 2022

- Relevant Coursework: Object-Oriented Programming (Java), Data Structures & Algorithms, Database Management Systems, Web Development.
